

Never Gonna Bring Us Down

Prime Circle

Let's start in a time
Way back when before
When the chaos wasn't quite so hard
To bear with anymore
When things were so simple
And times were not so fast
When it all comes down
To just one moment
And how it was surpassed

Just push on unaffected,
Contained and perfected
Break out no restrictions
We're not worlds apart

You're never going to bring us down
Never going to stop this flow
It all comes down to this now
And it won't stop with you
You're never going to bring us down
Never going to stop this flow
It all comes down to this
And it won't stop with you

Right now is the time
Seen all things we've done
Been so many different places
And conquered everyone

We've torn down to get back up
Seen what we're searching for
Won't stop now, won't lose direction
Won't let go from this intention

Just push on unaffected,
Contained and perfected
Break out no restrictions
We're not worlds apart
You're never going to bring us down
Never going to stop this flow
It all comes down to this now
And it won't stop with you
You're never going to bring us down
Never going to stop this flow
It all comes down to this
And it won't stop with you

You, You, You, You, You
It won't stop with you

You're never going to bring us down
Never going to stop this flow
It all comes down to this now
And it won't stop with you
You're never going to bring us down
Never gonna stop this
It all comes down to this

And it won't stop with you
