## Take Me Up

It's another place It's another hour It's another face And we're so far from home Now it's different Dialing number 9 And trying to get a line Just to hear a voice That I can recognize Not so different Now, sit and watch the world Through a window frame And I get so excited to take That stage again Take me up [2x] Gonna find out Take me up [2x] To the high ground Take me up Gonne find out Where I'm, where I'm going to

Just to close my eyes And to feel it Just to move around And believe it And trust it all I know you'll never let me fail

Looking out at all the faces That are staring back at me Are you listening Is it sinking in **Prime Circle**
