Tear It Down

Prime Circle

I think about the way that things go on.
I do, I do
Thinking of ways to defuse the bomb
And were all about to break the silence
Were all about to push some good
And then were coming up coming up faster
than we ever thought we could

After all that we've been through
After all they put us through
After all that we've been through
Were gonna tear it all down
Tear it all down
Tear it up tear it down
Hey hey hey what you gonna say

I wonder why the wheel it turns so fast
I Hope I hope
I hope this moment is gonna last
And time it moves so quickly sometimes
Faster than it should
But then were coming up coming up faster
than they ever thought we could

After all that we've been through
After all they put us through
After all that we've been through
Were gonna tear it all down
Tear it all down
Tear it up tear it down

Come up come see oh what is going down
Cause the world is coming out to scream aloud
After all we've been through
Were gonna tear it all down
