

# Chemical

Prince Royce

We love 'til we break down, it's good  
Turn me up with lights off like no one could  
Touching like it's the real thing  
Have you screaming my first name  
Showing off in the mirror  
Love how we love

I'm gon' fill this up, you gon' roll this up  
Driver pulling up with no delay  
We gon' throw it up, now we feel the rush  
Never gave a fuck 'bout what they say

This what we living for  
We fall in love every single night and every day  
Like nobody came before  
Maybe it's just a chemical high I'm feeling  
Love's still in my brain  
It's just a chemical high I'm feeling  
Love's still in my brain  
It's just a

Running wild turning heads in the street  
We stay up through the night, we don't get no sleep  
Take me up to the ceiling, oh now  
Go down, way down cause you know how  
Take it all, get it all  
We can barely breath

I'm gon' fill this up, you gon' roll this up  
Driver pulling up with no delay  
We gon' throw it up, now we feel the rush  
Never gave a fuck 'bout what they say

This what we living for  
We fall in love every single night and every day  
Like nobody came before  
Maybe it's just a chemical high I'm feeling  
Love's still in my brain  
It's just a chemical high I'm feeling  
Love's still in my brain  
It's just a

Fire in your eyes  
Lips pressed right on me  
Lighters in the sky  
Can't come down tonight

I'm gon' fill this up, you gon' roll this up  
Driver pulling up with no delay  
We gon' throw it up, now we feel the rush  
Never gave a fuck 'bout what they say

This what we living for  
We fall in love every single night and every day  
Like nobody came before  
Maybe it's just a chemical high I'm feeling  
Love's still in my brain

It's just a chemical high I'm feeling  
Love's still in my brain  
It's just a
