There was a time i was pretty unsure bout everything regarding you Didn't know if you wanted to kiss me or your lips were just twitchin but i wondered if you felt it too There's no way to know where this is going but i'm ready can't officially say we're going steady but

You are my apple and i wanna take a bite you might be hard on the outside but you're oh so sweet inside i love when you call and say you're just saying goodnight my apple goodnight

sometimes i feel like seein what you're doin but i feel like i'm getting on your nerves so i pretend like it don't bother me that it's been bout a week since your name was on my caller id there's no way to know where this is going but i'm ready can't officially say we're going steady but

You are my apple and i wanna take a bite you may be hard on the outside but you're oh so sweet inside i love you when you call and say you're just saying hello my apple hello

well i hope you don't get the wrong idea but i can't get over your lovin my dear i just don't know how to show so please don't take this the wrong way but i mean every word that i say and i just want you to know that you are my apple and i wanna take a bite i especially love it when you're kissin goodnight you are my apple and i wanna take a bite i especially love it when you're kissin me goodnight

you are my apple and i wanna take a bite you may be hard on the outside but you're oh so sweet inside i love when you call and say you're just saying hello my apple hello my apple hello my apple hello
