

You controlled me
Long enough
Your sick instructions
Ruined enough
Computed dreams
Are not what I want
We will end it
Here and now somehow

All your wires
In the heads
You are a leader
But you are dead
In your cold brain
You create the dread
With your cold brain
You make us mad

Cold strong visions
Get out of my head
Join the transition
Get out of my head

Humans against a machine
Minds against electricity
Hope against might
Blood against steel

The sleeper awakes
So be aware
The tension is high
Everywhere
