The Dreamer

Project Pitchfork

Steel is circulating
The air is cold
Mirrors reflecting
The sky
Skyscrapers
Cover the sun
A huge machinery
Slowly rotates
I close my eyes
My thoughts become wings

I fly high in the sky You are already waiting We kiss us in the clouds The future is rotating

The cold bites
All of us in uniforms
Like robots
Movements equated

Here is mind control You're violating virtual morality Corporal punishment Sets in now

The pain pulsates
My thoughts become wings
