

List of Grievances

Prong

Hear you scream
They are thieves
As you scheme
And hide behind political themes
So much greed
You're not free
But you speak
In this country openly
So you're bitching, best watch yourself

When it's time
For you to pay
You abstain
Feed your ego, that's your aim

A list of grievances I now write

You should just stop
So much you don't know about
Just end it now
Something we'll all cheer about

An enemy of society
Hear you speak
Like you are a deity
I got it now
You can't trust
So unjust
It's your business that's corrupt

Complain like everybody else

Self invest
Self impress
In excess
You and your self righteousness

A list of grievances I now write

You should just stop
So much you just talk about
It's got to end
The same things we've all heard about
You should just stop
So much you don't know about
Just end it now
Something we'll all cheer about

It's time for lies (it's time for lies)
It's time for debts (it's time for debts)
I'm just keeping sheets of broken rules
The side of right (the side of right)
The side of left (the side of left)
In between and everything untrue (untrue)

You should just stop
So much you don't know about

Just end it now
Something we'll all cheer about
You should just stop
The same things we've all heard about
It's got to end
Too much that's just talk
