

# The End of Us

Prozak

How many times must you try, must you fail?  
Freedom is a state of mind, transcended through hell  
Give it up, walk away  
You must conform to the norm  
You been a slave to the grind from before you was born  
Product of enviroment, must obey 'till retirement  
You see the shackling chains hang from the monument  
A hundred lives for every question you ask  
You spent in animations like it's contradicts from the past

Extortion  
Distortion  
The words that they believe  
My friend this is the end of us  
Abortion  
Emotion  
To force upon the weak  
So great this is the end of us

So great this is the end of us

The brother then is sent strange through the hourglass  
You're in a spirit filled with rage as the hours pass  
You can't describe how contrived is the final math  
And your salvation all relies on financial class  
Right now is the rise and the fall  
Clenching up your fists with your back against the wall  
You must fight for your lives with your eyes on the ball  
If it trade through the gates and repel down the walls

Alright, stop, listen  
What's that sound?

Just think for a minute  
And discover what is going down  
You farm bred to become consumers  
But who consumes who in this land of maneuvers?  
The crafty ways in this maze  
End of days, a perfect match for the empty graves  
It's about time we think for ourselves  
It's the right time to put the lies on the shelves  
What!
