

## Fix It

Psapp

Put me in the spotlight, oh I love the white heat  
Is it something you need too?  
Come and be my person, you know that I need someone  
But it doesn't matter who

Oh, I took your best times broke them like they were mine  
It wasn't what I meant to do  
There's something evil in me, a box without a good key  
Something that I know you have, too

We have bitten off more than we could chew  
Now we are running out of things we can do

You could be my makeup, I could be a lift up  
I never wanna be without you  
Something waiting in me, how is it you can't see  
When it is so clear and so blue?

We have bitten off more than we could chew  
We are running out of things we can do  
We have bitten off more than we knew  
Nothing's gonna to fix it, nothing's gonna to mend me and you

Put me in the spotlight, oh I love the white heat  
Is it something you need too?  
Come and be my person, you know that I need someone  
But it doesn't matter who
