

## Blue Screen

Psychostick

I can't believe it went down this way  
I had so much left to save  
I thought that we would last forever  
But now I'm taking it day by day

Oh, what I'd give to have you again  
But there's no way I can get in  
You shut me out of my whole world now  
My heart is in the recycle bin

And I don't know why  
Backups weren't on my mind  
'Till the day my computer died  
My hard drive fried and I cried  
I was too careless, now it's repairless  
I know that's not a word  
But I don't give a f\_\_less  
And now that you won't load  
Not even in safe mode  
I gotta check E-MAIL ON MY PHONE!

I feel as blue as my screen  
Your error message is true  
You formatted my heart  
And partitioned it in two

I'm trying so hard to be strong  
To be a man who can take a fall  
I guess I had to learn the hard way  
The price of making you hold it all

Now fate has forced me to interact  
With human beings who talk and laugh  
I'm in a hell of social functions  
Fresh air and sun have turned my heart black

And I know I tried, for the data you had inside  
Disk Utilities couldn't find  
Why my access was denied

Now it's all over, I'll never recover  
The memories you stored  
Must have been a bad sector  
And now you're so empty  
You boot up to nothing  
And now I gotta look up stuff in books

I feel as blue as my screen  
Your error message is true  
You formatted my heart  
And partitioned it in two

"Ah, come on. Really? REALLY? "

I saw you wouldn't get started  
I tried running GParted  
Through the night just to find you couldn't be revived

I had to lose all my shit to learn to  
Never forget that you can never depend on just a single drive

The saves to my games and all my porn  
I miss you, I miss you. (PORN!)  
I'll heal with time, but for now, I miss you, miss you [repeats]

I feel as blue as my screen  
Your error message is true  
You formatted my heart  
And partitioned it in two

I hit Control+Alt+Delete  
I guess there's no other way  
Now I'm formatting C colon  
But you come up blank, come up blank...
