

# Suicide Note Lullaby

Psyclon Nine

Never again  
The smell of smoke it fills your lungs  
Never again  
Choking on the fear of darkness falls  
Never to be held  
Never to be free  
Never hear what they say and never fall for me

One last kiss to satiate  
Ten thousand times is not enough  
Closing thine eyes  
Lost in crimson  
Trapped in all i despise  
It's fucking broken  
I never stop hearing the cries

I found my savior in these shards of shattered glass  
I am an exit to the blackness  
This is my last hymn to the fallen not again to touch the sky  
A suicide not lullaby

Never again  
Everyday we drown in agony  
Never again  
To taste the sickly sweet of decay  
When you're laying on the ground just remember to  
breathe, just breathe, just breathe, just breathe

One last kiss to satiate  
Ten thousand times is not enough  
Closing thine eyes  
Lost in crimson  
Trapped in all i despise  
It's fucking broken  
I never stop hearing the cries

I found my savior in these shards of shattered glass  
I am an exit to the blackness  
This is my last hymn to the fallen not again to touch the sky  
A suicide not lullaby

I found my savior in these shards of shattered glass  
I am an exit to the blackness  
This is my last hymn to the fallen not again to touch the sky  
A suicide not lullaby
