Everyday's a day you haunt me  
Everday's day I swear  
That any day when you are near me  
Is a day for which I care

No no you're not alone  
When there's someone you can hold  
Someone who is there  
No no you're incomplete  
'Til that someone that you meet  
She tells you she is there  
No you're not, no you're not

Any day's a day before me  
And could be our last affair  
You might fear the night will take me  
But every single night we share

No no you're not alone  
When there's someone you can hold  
Someone who is there  
No no you're incomplete  
'Til that someone that you meet  
She tells you she is there  
No you're not, no you're not
