

When You Know

Puggy

I made it to the City of Lights
Before they took over my life
And that's the only one I got.
Now they're gonna make me despair
They'll make me pay for the air
And that's the only one we got

They wanna make you believe
You're something that they can't see
But all you need is to think
And then...

Something tells me everybody hates me
What you gotta do, do it right
When you know, when you know, when you know

I made it through my very first night
Should only one person delight
It must have been quite a sight
Tomorrow was not so debonair
I told them how we should unite
And get together and fight
'Cause we're the only ones who care

He told me he didn't believe
We're all owned by crooks and thieves
So I bought him a drink
And then...

Something tells me everybody hates me
What you gotta do, do it right
When you know, when you know, when you know

Something tells me everybody hates me
What you gotta do, do it right
When you know, when you know, when you know

Something tells me everybody hates me
What you gotta do, do it right
When you know, when you know, when you know

Something tells me everybody hates me
What you gotta do, do it right
When you know, when you know, when you know
