

# Superstar

Pulsedriver

Reach for the sky  
and hold your head up high - for tonight  
and every night  
you're a superstar

And don't you be afraid  
think of all the friends you've made  
like any other night  
you've got to name in lights  
you're a superstar (you're a superstar)  
you're a superstar  
you're a superstar

you're a superstar

you're a superstar

you're a superstar

you're a superstar

you're a superstar

you're a superstar

When the world give everything  
don't you know that it don't mean a thing - at all  
at all for a superstar

Got to find a rainbow  
tell the world what everyone else knows  
don't let it tire to get alive cause you know you're a superstar

So reach for the sky  
and hold your head up high

For tonight  
and every night  
you're a superstar

And don't you be afraid  
think of all the friends you've made  
like any other night  
you've got to name in lights  
you're a superstar

So reach for the sky  
and hold your head up high

For tonight  
and every night  
you're a superstar

So don't you be afraid  
think of all the friends you've made  
like any other night  
you've got to name in lights

you're a superstar

you're a superstar  
and your eyes will make you see

you're a superstar
