

There's a silver moon in the midnight sky  
And lovers are heart to heart  
But love is a shadow  
Lost in your eyes  
And time has taken us apart  
But it's so far away and so long ago  
It's still so strong I want you to know

You're still right here in my heart  
Where you've been right from the start  
Still right here in my heart oh baby

There's a hollow sound in this empty room  
Echoes in the dark  
I wish I could wake and find you here  
Give us another chance to start  
But night after night day after day  
I love you so much I still have to say

You're still right here in my heart  
Where you've been right from the start  
Still right here in my heart oh baby

Well I wonder what you're feelin'  
Do you ever feel the same  
When you listen to your heart  
Do you ever hear my name

You're still right here in my heart  
Where you've been right from the start  
Still right here in my heart oh baby
