Armistice, their brave dead hearts Falls armistice, lost brave dead hearts Armistice, their grave dead hearts Falls armistice, the last waves depart Always love, always love, always lovers Us & them, the lost forgiven Dawn again & back through oblivion Always love, always love, always lovers And we call armistice, so alone, in droves Deliverance Is this deliverance? This is deliverance Deliverance Is this deliverance? This is deliverance Deliverance Is this deliverance? This is deliverance Always love, always love, always lovers Surrender if you feel this Hammer the steel No I can't let you go And when I find you That's when I'm gonna need you We've bled the last Our dead gone.
