## You Move Me

```
Puressence
```

Well I know there is something about you girl Though they say that nobody can change the world In your eyes there's a smile There's a soothing camomile Makes it feel worth my while, waiting for you girl You move me You move me You move... I must say I was smitten so long ago I got caught pulled right down by your undertow Just like the stars always shine Just like them you can't be mine Sing a sad Valentine all about you girl You move me You move me You move... I know it's time to stop believing every part of me is wrong I know it's time to start believing 'cos I need to carry on Without you girl You move me You move me You move me
