

Watch It Burn

Push Play

Love and it's consequences
You can't win but you can't get out
Leaving yourself defenseless
So high you can't get back down
Love and it's consequences
One long dramatic scene
Though we all know the ending
We still can make believe

Danger, danger
Flying like a moth to light
You can't save me this time

Woah
Don't give me a warning
Just be my next mistake
Woah oh
The sky is falling
Falling down in flames
And I don't want to turn
I love the way you make me hurt
I'll light it up this one last time
And watch it burn

Love and it's consequences
Embracing pure defeat
Covered in sweat and ashes
This is the last shit I need
In the fallout of explosions
Lost in the strangest dream
Watching it back in slow motion
You wince before you scream

Danger, danger
So many reasons to ignite
You can't stop me this time

Woah
Don't give me a warning
Just be my next mistake
Woah
The sky is falling
Falling down in flames
And I don't want to turn
I love the way you make me hurt
I light it up this one last time
And watch it burn
Woah

Maybe I've been too extreme
And too emotional
But now this has to go
I can't be well enough alone

Woah
Don't give me a warning
Just be my next mistake

Woah
The sky is falling
Falling down in
Start a fire and watch it grow
I love to see my love implode
I light it up this one last time
And watch it burn
Burn

And I don't want to turn
I love the way you make me hurt
I light it up this one last time
And watch it burn
