

Winter

PVRIS

Don't need to speak,
I think we've had enough of each other.
Don't make it worse,
All we did, all we did was suffer.
You were just physical touch, not necessarily love.
Just something to distract my aching brain for once,
I feel too little and I think too much.

Can you burn a fire in my flesh?
'Cause your love's so cold I see my breath.
I can't take another night,
Always frozen by your side.

Don't lose sleep,
You can steal some body heat from another.
Ice cold to the touch,
No I'll never be your snow covered lover.
That shit was pathetic, I need love.
I'm warm flesh and blood.
Call me spineless but at least I've got a heart between my lungs,
You feel too little and I feel too much.

Can you burn a fire in my flesh?
'Cause your love's so cold I see my breath.
I can't take another night,
Always frozen by your side.

(Frozen in your winter always.)
(Closing in your winter always.)

Winter in your soul,
You got no love in your bones,
Trying to find some heart from you
Is like draining blood from stones.
Winter in your soul,
You got no love in your bones,
You got winter in your soul,
You got winter in your soul.

Can you burn a fire in my flesh?
'Cause your love's so cold I see my breath.
I can't take another night,
Always frozen by your side.

Can you burn a fire in my flesh?
'Cause your love's so cold I see my breath.
I can't take another night,
Always frozen by your side.
