

# You and I

PVRIS

You and I.

I know it's warmer where you are  
And it's safer by your side  
But right now I can't be what you want  
Just give it time

And if you and I  
Can make it through the night  
And if you and I  
Can keep our love alive, we'll find

We can meet in the middle  
Bodies and souls collide  
Dance in the moonlight  
When all the stars align  
For you and I, for you and I, oh

I know it's cold when we're apart  
And I hate to feel this die  
But you can't give me what I want  
Just give it time

And if you and I  
Can make it through the night  
And if you and I  
Can keep our love alive, we'll find

We can meet in the middle  
Bodies and souls collide  
Dance in the moonlight  
When all the stars align  
For you and I, for you and I, oh

But for now we stay so far  
'Til our lonely limbs collide  
I can't keep you in these arms  
So I keep you in my mind

But for now we stay so far  
'Til our lonely limbs collide  
I can't keep you in these arms  
So I keep you in my mind

(Reaching out, can't feel you now)

Can we meet in the middle?  
Bodies and souls collide  
Dance in the moonlight  
When all the stars align  
For you and I, for you and I, oh
