

# Ghost Light

Pyramaze

Mind the bogs between night and day  
Will-o-the-wisp will lead you astray  
Dusk has come and shadows grow long  
The hour of ghosts and their luring song

On your own you'll feel the fear  
Of a thousand years  
What is right, what is wrong?  
When you see the ghosts light in the marshes  
Stand your ground till it's done

Elemental, spook or fairy  
No one knows but wise is the wary

Traveler in the dark, you seek the treasure or the way  
The flame of the ghost will guide you or tempt you  
Until the light of day  
Traveler in the dark, you seek the treasure or the way  
The walking fire will recede if you follow  
Until the light of day

Hear the unknown, it whispers your name  
The glow so enchanting, so warm is the flame  
Those who have followed are said to be lost  
You may solve it's riddle but at what cost?

In the dark all light seems kind but not all doors  
Are there to enter  
Let it burn in solitude, an elusive guest  
In lonely splendour

Elemental, spook or fairy  
No one knows but wise is the wary

Traveler in the dark, you seek the treasure or the way  
The flame of the ghost will guide you or tempt you  
Until the light of day  
Traveler in the dark, you seek the treasure or the way  
The walking fire will recede if you follow  
Until the light of day

Twilight songs from age to age  
Across the sea from land to land  
Skin shall shiver, hearts shall rage  
When you feel the ghost lights chant

Traveler in the dark, you seek the treasure or the way  
The flame of the ghost will guide you or tempt you  
Until the light of day
