## **Ghost Light**

**Pyramaze** 

Mind the bogs between night and day Will-o-the-wisp will lead you astray Dusk has come and shadows grow long The hour of ghosts and their luring song

On your own you'll feel the fear Of a thousand years What is right, what is wrong? When you see the ghosts light in the marshes Stand your ground till it's done

Elemental, spook or fairy No one knows but wise is the wary

Traveler in the dark, you seek the treasure or the way The flame of the ghost will guide you or tempt you Until the light of day Traveler in the dark, you seek the treasure or the way The walking fire will recede if you follow Until the light of day

Hear the unknown, it whispers your name The glow so enchanting, so warm is the flame Those who have followed are said to be lost You may solve it's riddlebut at what cost?

In the dark all light seems kind nut not all doors Are there to enter Let it burn in solitude, an elusive guest In lonely splendour

Elemental, spook or fairy No one knows but wise is the wary

Traveler in the dark, you seek the treasure or the way The flame of the ghost will guide you or tempt you Until the light of day Traveler in the dark, you seek the treasure or the way The walking fire will recede if you follow Until the light of day

Twilight songs from age to age Across the sea from land to land Skin shall shiver, hearts shall rage When you feel the ghost lights chant

Traveler in the dark, you seek the treasure or the way The flame of the ghost will guide you or tempt you Until the light of day
