Until We Fade Away

Pyramaze

Watch us now, years went by like days I see your face, there's love and no regret But the lines have changed you're not the girl I once met

We're older and stronger I don't question this any longer And although sometimes it's hard We won't drift apart

Now I'm falling through mazes of memories From the beginning until now, we got this far somehow Now I'm falling through mazes of memories From the beginning until now, we got this far somehow

Where do we go when we grow old I do not know, but I've been told It's easier if your not alone You won't have to go through life On you own

'Cause I'll stay, until we fade away Time Passing by, somethings stay the same I can still remember things I once said I'll be there when you cry out my name

'Cause I'll stay, until we fade away Time Passing by, somethings stay the same I can still remember things I once said I'll be there when you cry out my name
