

## Sword Of Destiny

Pythia

There is a sword beneath the sea that can hold back war's misery  
Within a kingdom lost in time, inside a child's mind  
It holds the key to endless peace, and so our search can never cease  
Our only hope for happiness and end to distress  
One fine day we will be saved  
Sword of destiny  
I feel the beating of your heart  
Sword of destiny  
It's time to show yourself  
Sword of destiny  
I feel the beating of your heart  
We've left so many dead behind, we left them hurt, been so unkind  
We've traveled roads to find a door but we have one law  
Been cruel in killing and in shame because we thought to try again  
But we are slaves to bloody war, and we know no more  
Help us find our saving grace  
The road is long but I am able to set you free  
Metal in my hand, my heart grows stronger  
I can stand my ground for that much longer  
There is a dream we must fulfillment, in every single iron will  
We cannot live our lives at war, we beg for no more  
We have to try and try again, and we will search until the end  
Until we find the magic blade and we are all saved  
Hear me begging on my knees
