

Sword Of Destiny

Pythia

There is a sword beneath the sea that can hold back war's misery
Within a kingdom lost in time, inside a child's mind
It holds the key to endless peace, and so our search can never cease
Our only hope for happiness and end to distress
One fine day we will be saved
Sword of destiny
I feel the beating of your heart
Sword of destiny
It's time to show yourself
Sword of destiny
I feel the beating of your heart
We've left so many dead behind, we left them hurt, been so unkind
We've traveled roads to find a door but we have one law
Been cruel in killing and in shame because we thought to try again
But we are slaves to bloody war, and we know no more
Help us find our saving grace
The road is long but I am able to set you free
Metal in my hand, my heart grows stronger
I can stand my ground for that much longer
There is a dream we must fulfillment, in every single iron will
We cannot live our lives at war, we beg for no more
We have to try and try again, and we will search until the end
Until we find the magic blade and we are all saved
Hear me begging on my knees
