I Despise You

You mean nothing but trouble baby, beat it You mean nothing but trouble baby, beat it If you think that you're still my friend You are wrong, don't you understand We can't go on like this, love was just a game now

You deceived me like a child so stupid You deceived me like a child so stupid I never believed you're a duchess 'Cause you cannot lie when you ought to But I loved you so, everything was different

I despise you, I despise you

You tumbled all back down I despise you, I despise you The queen without a crown

I despise you, I despise you You tumbled all back down I despise you, I despise you The queen without a crown

You mean nothing but trouble baby, beat it You mean nothing but trouble baby, beat it If you think that you're still my friend You are wrong, don't you understand We can't go on like this, love was just a game now
