

Killer (Tits)

Queen Adreena

Now you're a life's obsession
I'm lying here sick with the bleed
There's a body in the basket
And no one needs my need
Feet to kick down
But no tread to the spin
I'm getting too fat and now I'm getting too thin
You said I was the only one to bring you off that way
You said I was the only one to bring you off that way
Will I ever grow out of this torture?
Swipe fight turn out the lights
It's a no-win situation
Another day ends with her head in the noose
Now I'm lying here
Must not flicker or move
Write down every time it happens to you
You said I was the only one to bring you off that way
You said I was the only one to bring you off that way
Punch drunk braindead down on the floor
Back on my knees, you got me begging for more
Punch drunk braindead down on the floor
Back on my knees, you got me begging for more
You said I was the only one to bring you off that way
You said I was the only one to bring you off that way
You said I was the only one to bring you off that way
You said I was the only one to bring you off that way
