

You (Don't Love Me)

Queen Adreena

When I look at you I get confused
You seem to be more me than you
When I look you in the eye
The universe collapsed and died
When I throw the windows wide
I heard you breathe our suicide
Cause you don't love me
You don't love me
When I heard you crying in the night
I swear it's my voice locked outside
An alien tongue in an alien mouth
The compass splits magnetic south
The molten ore and lava flow
I crawl through glass on broken bones
Cause you don't love me
You don't love me
Crash and burn of a blackened heart
A suitcase full of body parts
Planted in my womb a seed
And I gave birth to you and me
When I look you in the eye
A double helix suicide
Cause you don't love me
You don't love me
