

Another World

Queen

In another world
Under another sky
I see another story waiting
To be told

And another You - wakes up -
With another Me
For that's the way, we've come to be
In Another World

In a different place
Way 'cross Time and Space
The door is open wide
Drawn to a different light
Maybe we'll step inside
In Another World
We can show we care
You can be sure I'm waiting there -
In Another World
solo part goes up one like this:
When the dice were cast
They laid a crazy path we follow to our graves
But I know in different world
We journey a different way
So we live but life
Isn't what it seems
We're only living in our dreams
In Another World
You can believe I'll meet you here
In Another World
