

C'est la Vie

Quietdrive

Back then you know we felt much younger
We never thought that we'd get older
We got crazy we got carried away
but we made our mistakes
There's not a thing I would change
She's been waiting
I've been chasing dreams and all my
expectations
Always holding out for something more
C'est la vie, say no more
To all that I've promised
For all that I've hoped for
and nothing more
C'est la vie, say no more
We never listened no we never learned
When it comes to messing up
you know we all took a turn for the worst
For the better
If we're going down now
then we're going down together
She's been waiting
I've been chasing dreams and all my
expectations
Always holding out for something more
C'est la vie, say no more
To all that I've promised
For all that I've hoped for
and nothing more
C'est la vie
If I could be honest
If I could take back all I've said
because
She's been waiting
I've been chasing dreams and all my
expections
C'est la vie, say no more
C'est la vie
You say that you love me
You say that you care
but I know you better
Yes I know you better
You say that you need this
but I only need these simple words
(she's been waiting I've been chasing)
C'est la vie, say no more
To all that I've promised
For all that I've hoped for
and nothing more
Sing C'est la vie
I've had to many lovers
who've walked out on me
but
She's been waiting
I've been chasing dreams and all my
expections
C'est la vie, say no more
C'est la vie

She's been waiting and I've been
holding on
She's been waiting and I've been
holding on
