

Days Go By

Quietdrive

Time goes by
Where does it go and why?
Why does it feel so right
with you by my side?
'Cause baby you feel amazing
you put the color into my life
And lately I'm going crazy
Watching the days go by
Watching the sun fall out of they sky
Watching the time go by
Watching the world change in front of
your eyes
I've seen it before
I know it for sure
This is exactly what I'm looking for
Watching the days go by with
A few months turn into years
When your voice fills my ears
And if your hair turns into grey
I promise I will love you the same
I'll give you the world
along with my heart
Baby we'll make it through
when the times get hard
And lately I'm going crazy
Watching the days go by
Watching the sun fall out of they sky
Watching the time go by
Watching the world change in front of
your eyes
I've seen it before
I know it for sure
This is exactly what I'm looking for
Watching the days go by with
Times are a changin
The music is playin
The world goes round and round
The wind doesn't stop
Will you save me a spot
When the days go by
Where they go?
I still don't know why
Watching the times fly by
Watching the world change in
front of your eyes
I've seen it before
I know it for sure
This is exactly what
I'm looking for
Watching the days go by with you
Days go by with you
