

It Says a Lot

Quietdrive

It says a lot
It says a lot
Even though I never
told you what was on my mind
I hurt a lot
It hurt a lot
Even though I didn't mean
for it to hurt all the time
But you can't take a good man with you
No you can't bring a good man down
Well if you can't take a good man with you
Then leave me out
It says a lot
It says a lot
Even though I never told you what
was on my mind
I think a lot
I think a lot
Even though I shouldn't think
about you all of the time
But you can't take a good man with you
No you can't bring a good man down
Well if you can't take a good man with you
Then leave me out
I dream a lot
I dream a lot
Even though I shouldn't
dream about you every day
It meant a lot
It meant a lot
Even though I wish I
would've had the guts to say
It says a lot
It says a lot
When you admit that I was
right about a thousand times
I drink a lot
I drink a lot
That's because I need to drink
to have the guts to say
That you can't take a good man with you
No you can't bring a good man down
Well if you can't take a good man with you
Then leave me out
Just leave me out
Well if you can't take a good man with you
then leave me out
just leave me out
just leave me out
