

# RUN AWAY

Quietdrive

Where do you go when you're lost and alone?  
Where do you run away? How did you get away, from me?

Well hello, are you there?  
Is it late, do you care?  
Cause your voice it sounds so different  
And the connection seems so distant  
And I know that you're scared  
Open up, I am here  
Cause the silence tells me everything  
When you won't show me anything, oh

I gave you everything  
I only wanted to breathe in your afterglow

Where do you go when you're lost and alone?  
Where do you run away? How did you get away, from me?  
Because you ripped me to pieces when you left this town  
That will never change, you'll always run away

Are we done? Is this it?  
Are you lost? Did you quit?  
When the odds are stacked against us  
And the temptation seems relentless  
And the night is cold  
When you're out on your own  
Because all I see is the obvious  
That you just want to be done with this, so

I gave you everything  
I only wanted to breathe in your afterglow

Where do you go when you're lost and alone?  
Where do you run away? How did you get away, from me?  
Because you ripped me to pieces when you left this town  
That will never change, you'll always run away from me

I never thought that I could be so lonely  
I never thought that I could be so lonely  
I never thought that I could be so lonely  
I never thought that I could be so lonely  
Waiting one last change I'll say goodbye I will survive

Where did you go when you left me alone?  
Where did you run away? How did you get away from me?  
Because you ripped me to pieces when you left this town  
And your friends they all tell me it's all over now  
Cause you'll never change, yeah you won't hesitate  
Yeah you'll just run away, I hope you'll stay away

From me, from me  
I hope you stay away, stay away  
(From me...)
