I know you say Maybe some day I need never be alone I know I say It's the right way But you'll never be the one

I've been walking alone now For a long, long time I don't wanna hang out now With the friends who just aren't mine

Party to party You've been looking But your search will never end You've been hanging With the wrong crowd You've got all the right friends

I've been walking alone now For a long, long time I don't wanna hang out now With the friends that just aren't mine

- I don't wanna be with you anymore I just don't want you anymore I don't wanna be with you anymore
- I just don't want you anymore
- I don't wanna be with you anymore
- I just don't want you anymore
- I don't wanna be with you anymore
- I just don't want you anymore
