

Call Me Out

Ra Ra Riot

The life I hide
While the world lays in bed
Waiting for you to call me out
Call me out

I read a blood once
And I liked it
I read a comic that you left there
A leak to your little secret room

And that's when you were coming
Out of the dark and into last night
Oh but baby you're not my kind

Windows on the ground floor
Mad out so it's quiet
Master of the universe
Only at night
Screaming in my vein
You turned just the same
I don't believe in blood
It was fate

So that's when you were coming
Out of the dark and into last night
Oh but baby you're not my kind

Cause you're super, super, super babe

And yet I lay here
Will I make it just another day
And then will you call me out
Call me out

I read a blood once
And I liked it
I read a comic that you left there
A leak to your little secret room

And that's when you were coming
Out of the dark and into last night
Oh but baby you're not my kind

Cause you're super, super, super babe

Cause you're super, super, super babe
Cause you're super, super, super babe
