

# Elevate

Rachael Lampa

I'm always hearing people say  
Never set your sights too high  
We'd have wings if we were meant to fly  
But I never felt that way  
Cause in my dreams I've seen the view,  
And life above the clouds is beautiful

Don't let the circumstances keep you down  
You might just miss your chance to leave the ground

We gotta elevate, take this thing to a higher place  
Don't you know you can rise above it all? Together we  
won't fall  
No matter what it takes, let the sun shine on your face  
Take each day as another chance to try, another chance  
to change our lives  
We've got to elevate, elevate  
Elevate, elevate, elevate, elevate

I'm just one face in the crowd  
Trying to go another way even if it's just one step  
today  
So don't let anybody doubt  
There's endless possibilities  
If you're not afraid to dream out loud

Don't let the circumstances keep you down  
You might just miss your chance to leave the ground

We gotta elevate, take this thing to a higher place  
Don't you know you can rise above it all? Together we  
won't fall  
No matter what it takes, let the sun shine on your face  
Take each day as another chance to try, another chance  
to change our lives  
We've got to elevate

When the camera pulls out wide  
On this mountain we will climb  
And you can see a thousand faces at your side  
Though the journey is our own  
You won't make it alone  
So don't stop climbing till you're home

We gotta elevate, take this thing to a higher place  
We can rise above it all; together we won't fall  
We gotta elevate, take this thing to a higher place  
Don't you know you can rise above it all? Together we  
won't fall  
No matter what it takes, let the sun shine on your face  
Take each day as another chance to try, another chance  
to change our lives  
We've got to elevate, elevate, elevate, elevate  
Elevate, elevate, elevate, elevate
