

My One and Only

Rachael Lampa

I'm flying high in your arms tonight
Passing the satellites, the earth is fading fast
Don't care where we go, let's make it last
Facing up to the speed of light, with time at our backs

I'm right here next to you and feeling so fearless now
We can do anything, nothing can hold us down
You rescued me from the weight of the world and I want
you to know

You are my one and only
You're not like the rest, I know that you've got my
back
You are, you are
You are my one and only
Right from the start, you saved my damaged heart
You are, you are, you're the one and only, only, only

Every time that I see you smile
It's like all of the universe is dancing in your eyes
A new star is born so let's make a wish
Let's put on a show tonight and light up the sky

I'm right here next to you and feeling so fearless now
We can do anything, nothing can hold us down
You rescued me from the weight of the world and I want
you to know

You are my one and only
You're not like the rest, I know that you've got my
back
You are, you are
You are my one and only
Right from the start, you saved my damaged heart
And you are, you are
My one and only yea, my one and only yeah, my one and
only yea yea
My one and only yea, my one and only yeah, my one and
only yea yea

My love will last forever, that's right I said forever
It's all because you made my heart believe
It's something powerful, so indestructible
It will live for eternity

You are my one and only
You're not like the rest, I know that you've got my
back
You are, you are
You are my one and only
Right from the start, you saved my damaged heart
And you are, you are my one and only
My one and only yea, my one and only yeah,
My one and only
My one and only yea, my one and only yeah
My one and only
