

My Town

Racoon

We got a supermarket and a church
For anyone who's got the urge
There's a nightclub and a school
Faith, a devil and a god
But more important, there's a bar
We've got neighbours with new cars
Brand new cars

Here in my town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

So the city wasn't what you thought it'd be
Every night you woke up
In lost and found, you see
I saw you every night
And everybody is always in a hurry
Yeah they run, run, run, run
Oh man, that's just not me
I know you disagree
But I'll stay here in

My town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

But the city is always warm and pleasing
No stuck up folks, brand new diseases
Everywhere around
Get my kicks more than a lot
The more I get, the more I lose my appetite
And that's not right
I'll stay in

My town, my little town
My little town, my town, this is my town
This is my town, my little town
My little town, my town, this is my town

We got a supermarket and a church
For anyone who's got the urge
There's a nightclub and a school out there
Faith, a devil and a god
But more important, there's a bar
We've got neighbours with new cars
Not that us folks would drive real far
