My Town

We got a supermarket and a church For anyone wholls got the urge Therells a nightclub and a school Faith, a devil and a god But more important, there's a bar Wellve got neighbours with new cars Brand new cars

Here in my town, my little town My little town, my town, this is my town This is my town, my little town My little town, my town, this is my town

So the city wasn t what you thought it d be Every night you woke up In lost and found, you see I saw you every night And everybody is always in a hurry Yeah they run, run, run, run Oh man, that just not me I know you disagree But I'll stay here in

My town, my little town My little town, my town, this is my town This is my town, my little town My little town, my town, this is my town

But the city is always warm and pleasing No stuck up folks, brand new diseases Everywhere around Get my kicks more than a lot The more I get, the more I lose my appetite And that's not right IDll stay in

My town, my little town My little town, my town, this is my town This is my town, my little town My little town, my town, this is my town

We got a supermarket and a church For anyone wholls got the urge Therells a nightclub and a school out there Faith, a devil and a god But more important, there's a bar Wellve got neighbours with new cars Not that us folks would drive real far
