

Feels Like Forever

Radical Something

I've been waiting a long time
Feels like forever now, feels like forever now
And I can't wait any longer
So we're coming together now, so we're coming together now

Check this out
Jeans stitched up, hoodies ripped up
I feel like I'm falling apart
Got people on my mind out there
On their grind out there
That would love to come and take your heart
I love it when we roll in together people know were together
Like were 4 chords stuck in a melody
And its groovy, fine, like waiting in a movie line
And you'll do nothing but remember me

[Chorus]

She said she heard us on the radio
But she's lying, she don't listen to the radio
And its fine, cuz every single place we go
We bring that golden state of mind
And when we roll in together wouldn't know any better
That we're cruising to the edge of the earth
You gotta put your mind out there
What you find out there is precious whatever it's worth

[Chorus]

Feels like forever's got us coming together
Feels like forever's got us coming together
Feels like forever's got us coming together
Feels like forever's got us coming together
