

Long Way Home

Radical Something

These ego's trying to break our souls getting high off yours
These ego's trying to break our souls getting high off yours

So it's a long way home
All my brothers and sisters
It's a long way home
So lemme know if you're with us
So it's a long way, a long way home
But we're all in this together, yeah
But we're all in this together, yeah

It's like, one way, one life
You can set it off right
You can find your true north, that's right
That's right that light right there up in the sky
In between
Halfway to love and peace, and I wont
Watch them fall to injury cuz I'ma help them keep their feet
And it's our job to seek, seek them out amongst the crowd
Wanna tell 'em all but you don't know how?
Do what we did, grab the mic and sing real loud

Just like, one day, one night
You can set it off right
You can find your new course, that's right
That's right that blindfold tied and fastened tight it just got
sliced
Only heard the stories of light, now you know the glory of light
And it's our job to find, find what freedom does
Cuz peace love are treatment cuz
Achievement does play a hand in relieving us
The grease the rust the greed the lust
But just don't breathe the dust

These ego's trying to break our souls getting high off yours
But we're all in this together, yeah
But we're all in this together, yeah
But we're all in this together, yeah
But we're all in this together, yeah

You and I, love, you and I, said you and I
You and I, love, you and I, said you and I
All my brothers and sisters, all my brothers and sisters
