

Tie-dye shirts, feathers in your hair  
Dancing in circles we can smell the fresh air  
Music's all we got but damn it's all we need  
Out here on our own life is so pure, oh yeah  
Life is so pure  
Life is so pure

don't think you ever have to be lonely  
don't think you ever have to be the only one out on your own now  
you just met the world and it's ready for you  
we're spinning in circles slowly away from everything that's phony  
we're clearing our minds now, and feeling fine what we're ready to do

I think that we should move to the mountains  
Just you and me and we'll never come back  
Done looking for the truth cuz we found it  
I hope you know we found it, I hope you know we found it, yeah

[Chorus]

get a little muddy, laugh about the money  
and wonder why we ever even cared about it  
the city is funny but nature is lovely  
another night with you I can't be without it

And all I ever dreamed of is disappearing  
Saddle up with my people and tell my old life that I'm leaving  
I'm leaving right now

I think that we should move to the mountains  
Just you and me and we'll never come back  
Done looking for the truth cuz we found it  
I hope you know we found it, I hope you know we found it, yeah
