

# Forever

Rage

From the beginning you learned that we all have to die  
You got so used to the fact that you don't wonder why  
You don't ask:  
How does it feel to someone when the moment has come  
When all is taken away, an existence is gone, who'll be his guide

Take his soul and take his mind  
And his opened eyes stay blind

Forever - you know there was someone inside  
The smile on these lips don't seem right  
Forever's a very long time  
Forever - these cheeks growing colder and grey  
A smile that is fading away  
Forever a very long time

You know it happens a thousand times every day  
You can't imagine you might be the next, you don't want to care  
But lady luck is a bitch, won't stay at one place twice  
Wipes a curl from your eye and kisses you goodbye, goodbye

Leaves you soul and leaves your mind  
And your broken eyes stay blind

Forever - you know there was someone inside  
The smile on these lips don't seem right  
Forever's a very long time  
Forever - these cheeks growing colder and grey  
A smile that is fading away  
Forever a very long time

So take good care of what you say  
It might be coming back one day  
So take good care of what you do  
This chance might be the last for you

You know it happens a thousand times every day  
You can't imagine you might be the next, you don't want to care  
But lady luck is a bitch, won't stay at one place twice  
Wipes a curl from your eye and kisses you goodbye

Leaves you soul and leaves your mind  
And your broken eyes stay blind

Forever - you know there was someone inside  
The smile on these lips don't seem right  
Forever's a very long time  
Forever - these cheeks growing colder and grey  
A smile that is fading away  
Forever a very long time

Forever  
Forever - forever and ever, forever's a very long time  
Forever  
Forever - forever and ever, forever's a very long time
