

Start!

Rage

Think back to when you were younger
Remember when life had no scars
You were at home in your own mind
Responsive to your inner call

I'm waiting, you'll come back
I'm waiting for your return

Don't waste your time any longer
Start a new story, start a new glory
Don't waste your time any longer
Start a new story, start a new glory in life

You're in a state of progression
Shapeless fears break free somehow
Your life became an obsession
When the machine stole your days

I'm waiting, you'll come back
I'm waiting for your return

Don't waste your time any longer
Start a new story, start a new glory
Don't waste your time any longer
Start a new story, start a new glory, just start

Why do you lose your time in senseless rites
That dry your will away

I'm waiting, you'll come back
I'm waiting for your return

Don't waste your time any longer
Start a new story, start a new glory
Don't waste your time any longer
Start a new story, start a new glory, just start

Start a new story, start a new glory in life
Start a new story, start a new glory, just start

Don't waste your time any longer, just start
