

## The Edge of Darkness

Rage

Tell the world we'll lose our future any time  
This will be a rude awakening if we don't stop now  
Everywhere we see the atomic threat will be  
Handled by the bad, the deceivers that gone mad  
Lead us into death

To hell and back, we're  
On the edge of darkness  
Never return  
On the edge of darkness

When the nuclear dictators ride the bomb  
Hell is here to stay forever, do you want it so

Instability killing the economy  
Continents in war throwing horror on the poor  
Mother nature dies

To hell and back, we're  
On the edge of darkness  
Never return  
On the edge of darkness  
When will we learn

Pull your head out of the sand, you need to know  
Your ass, it will burn red hot, right when it all explodes

Everywhere it seems all those people lost their dreams  
Everyone's insane, all the warning was in vain  
Blinded 'till we're dead

To hell and back, we're  
When will we learn, will we ever learn
