The Edge of Darkness

Tell the world we'll lose our future any time This will be a rude awakening if we don't stop now Everywhere we see the atomic threat will be Handled by the bad, the deceivers that gone mad Lead us into death

To hell and back, we're On the edge of darkness Never return On the edge of darkness

When the nuclear dictators ride the bomb Hell is here to stay forever, do you want it so

Instability killing the economy Continents in war throwing horror on the poor Mother nature dies

To hell and back, we're On the edge of darkness Never return On the edge of darkness When will we learn

Pull your head out of the sand, you need to know Your ass, it will burn red hot, right when it all explodes

Everywhere it seems all those people lost their dreams Everyone's insane, all the warning was in vain Blinded 'till we're dead

To hell and back, we're When will we learn, will we ever learn

Rage
