Heir of Darkness

The infinity of blackness calms me I feed in its embrace It makes me strong Gives me powers beyond life I'm in a womb-son of darkness My throne be the womb As my unborn soul is eternal

Mother eat the light Raise me in forever black night. And so I swear Never to leave this dark My kingdom of hate

Emptiness between the stars Black nothing of eternal night Granter of unlife-mother of silenced souls Sator-Saturnus-Sathanas

I will never be born Forever embryo of blackness I inherit the hate That dissolves the light and blackens the stars In my kingdom of night Beginning of time never was and never will be For I was there And forever am.
