

# Heaven Help Me

Rain

Open my eyes  
Your burning light  
[x2]

There's something in the air tonight  
I feel it in my bones it's over  
Written in the stars the darkness comes to light  
I walk along to feel alive  
It's colder when we go into the fire  
Come a little closer hold me through the night

Pull me out of the water  
Give me all the air I need

Heaven help me  
Heaven save me from myself  
I've been losing my religion  
Headed for collision without you  
Heaven help me  
Can you save me from myself  
I've been losing my religion  
Headed for collision without you

You gotta do it for yourself  
No one else can fall to save ya  
Black and blue they'll cover you  
The waves crash down  
Running from the gates of hell  
All you gotta do is read the signs  
Love is like a choir of angels holy sound

Pull me out of the water  
Give me all the air I need

Heaven help me  
Heaven save me from myself  
I've been losing my religion  
Headed for collision without you  
Heaven help me  
Can you save me from myself  
I've been losing my religion  
Headed for collision without you

Open my eyes  
Your burning light  
[x4]

Heaven help me (can you help me now)  
Heaven save me from myself (can you save me now)  
I've been losing my religion  
Headed for collision without you  
Heaven help me (can you help me now)  
Can you save me from myself (can you save me from myself)  
I've been losing my religion (headed for collision)  
Headed for collision without you

Open my eyes

Your burning light  
[x2]

Can you save me now
