## You're Gonna Get What's Coming

## **Bonnie Raitt**

You came up on me like a landslide Once in a while I get taken like that And I like it

I've got a Thunderbird parked right outside Give me a minute to finish this thing And we'll ride it

In all this heat it's a job keeping cool And I could fry an egg on you

You came up on me like a landslide Once in a while I get taken like that And I like it

You're gonna get what's coming You've been asking for it two days running You're gonna get what's coming You're gonna get what's coming to you

You're gonna get what's coming You've been asking for it two days running You're gonna get what's coming You're gonna get what's coming to you

I hope that you're half as intrepid as you make out More often than not, I'll bet You never got what you asked for

Keep on pouring until you hear me shout And turn up the sound If you want me to drive any faster

Caution went out when you walked in the room If it never came back it would be too soon

You came up on me like a landslide Once in awhile I get taken like that And I like it

You're gonna get what's coming You've been asking for it two days running You're gonna get what's coming You're gonna get what's coming to you

You're gonna get what's coming You've been asking for it two days running You're gonna get what's coming You're gonna get what's coming to you
